Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I am a low income worker that puts in my 40 hours a week and its hard enough to pay rent and all other costs. not even thinking of kids which i would like to have in the near future. I'm 22 and struggling to make ends meet like the mas-majority of the blue collar workers. hiking costs will make you loos the money you think you are going to recieve. THE rich get richer and the poor, well you know, there is no middle class anymore. moving forward with this act will do nothing but make it harder for the the common worker.

Sincerely,

Kenneth Thomas III
